RELEVANT PROJECTS

Crabitat Combo - Independent Card Game

- Designed and prototyped an original tabletop card game, iterating on mechanics, balance, and player experience through playtesting and revision.
- Successfully funded **\$2,300 on Kickstarter from 30 backers**, managing campaign planning, manufacturing coordination, production logistics, and fulfillment preparation.
- Created the visual layout and presentation of the card game using Photoshop and InDesign, developing card designs, print-ready assets, and overall product presentation.
- Promoted the game through conventions, community outreach, and networking with industry peers to build visibility and gather player feedback.

Astromando - Collaborative Unreal Engine Project

- Collaborated on a 4-person team to develop an original game prototype in **Unreal Engine**, contributing across gameplay, level design, and systems development.
- Primarily focused on AI implementation, designing enemy behavior using **behavior trees** to support responsive and engaging gameplay.
- Used **Perforce, Atlassian, and Jira** to coordinate development, manage tasks, and integrate team contributions efficiently.
- Delivered a polished, playable prototype under deadline through iterative development, testing, and team collaboration.

Pressure Keeper - Pico 8 Game Jam Project

- Built a complete game jam project in **Pico-8**, adapting design and implementation decisions to strict limitations on code size, sprite usage, and available colors.
- Implemented foundational systems from scratch, including **collision handling, particle effects, and timer-based logic**, to support gameplay and responsiveness.
- Structured object data and reusable behaviors using Lua tables, demonstrating strong understanding of lightweight data-driven design.

WORK EXPERIENCE

Full Sail University - Lab Specialist in Game Design

March 2023-Present

- Support campus and online students in Game Design courses by answering questions and providing guidance on assignments, primarily in Unreal Engine.
- Facilitate productive lab sessions by troubleshooting technical issues, clarifying course material, and mentoring students on best practices.
- Monitor online channels to ensure timely responses and consistent support for remote learners.

EDUCATION

Computer Science Bachelors - Full Sail University

February 2027

Game Design Bachelors of Science - Full Sail University

November 2022

- Salutatorian & Academic Achiever Award
